Protect. Share. Connect.®

## About Us

Blackline GPS™ develops, manufactures, and markets products and services that deliver safety, surveillance, security, and delivery service user experiences through web, mobile, web service, and messaging interfaces. Blackline solutions Protect. Share. Connect.™

Founded in 2004, Blackline is headquartered in Calgary, Alberta Canada and is a public company traded under the symbol BLN on the TSX Venture exchange.

## Capabilities

We efficiently respond to customer demand, creating tailored customer experiences and workflows. Leveraging end-to-end technology ownership, Blackline produces user interfaces, web applications, mobile applications, wireless location devices, background services, and messaging systems.

### Safety Solutions

Blackline is a leader in the mobile worker safety industry. Our Loner safety solutions communicate worker safety awareness to monitoring staff via mobile, web, and web service interfaces, for efficient emergency response.

**Sectors:** Utilities, transportation, property management, guard services, mobile sales, real estate, homecare, maintenance, delivery services

**Customers:** Enmax Corp., Waste Management, Ryder Transportation, American Red Cross, AltaGas, Edon Management

### Surveillance Solutions

Our new Javelin™ and Flat Track™ covert locator products provide the Surveillance Industry with the most powerful tools for monitoring targets' driving activities.

**Sectors:** Police services, border protection, homeland security, private investigation

**Customers:** FBI, RCMP, regional police services

### Security Solutions

Blackline's Entourage™ CIS and Entourage™PS security locators are joined by Javelin and Flat Track to create a powerful suite of products that provide security awareness.

**Sectors:** Consumer automotive, auto dealer, inventory and shipment loss prevention

**Customers:** big box retail, online retail, dealers, distributors, auto dealerships

### Delivery Service Solutions

Our Progress™ web application creates geographic location-enabled tracking numbers that enable end customers to view the online delivery progress of their shipment.

**Sectors:** Auto vehicle transport, live organ transplant, and package delivery

**Customers:** Passport Transport, Organ Recovery Systems, and Consolidated Logistics
